**Location:** Lucky Bastard Distillers, 814 47th street East, Saskatoon, Saskatchewan

**Registration:** 5:30 pm • **Presentation:** 6:00 pm • **Reception/Tour:** 7:30 pm

---

### Theme: Hotter than Hades: Intumescent Coatings for Fire Protection

---

Whether you are a general contractor, fabricator, architect, engineer or owner, we believe you will be amazed by what you will learn with regards to understanding and using intumescent coatings for commercial, institutional and industrial projects. The critical factors of how to successfully apply fireproofing for both cellulosic or hydrocarbon fires will be explored in detail so that substantial cost savings in projects can be assured.

Using case histories, and performance evaluations of passive fire protection, special emphasis will be given to both epoxy intumescent and cementitious fireproofing as well as a next generation intumescent coating that is taking the fire protection world by storm.

**Speaker:** Dr. Mike O'Donoghue  
Director of Engineering and Technical Services, Protective Coatings Canada / Akzo Nobel

Dr. O'Donoghue brings over 30 years of experience in the protective coatings industry and has a Ph.D in Inorganic Chemistry from the University of Surrey, England. He is in great demand as a speaker at construction industry conferences internationally. A lively and engaging speaker, Dr. Mike is certain to entertain and inform you on how to obtain your best value from the use of intumescent protective coatings.

**Registration Fee:** \$20.00

**Register by emailing**
