

BUILDING THE FUTURE WITH HSS

Hollow structural sections give architects, engineers, and fabricators powerful tools to create the landmarks and infrastructure of tomorrow. The unique properties of HSS can help solve a variety of aesthetic and structural efficiency problems, making them attractive for projects big and small.

Squares up to 22" x 1" wall

Rectangles up to 34" x 10" x 1" wall

Rounds up to 28" OD x 1" wall

Specifications: ASTM A500 | CSA G40 (Class C and Class H)

And now, the on-site erection of HSS can be more streamlined thanks to Shuriken™, the Better Bolted Connection — an innovative connection solution for situations where access to both sides of the connection is limited.
